I think the Hydro Scheme is a positive development for Glenachulish. Good to harness the Hydro power for good.

Exciting if we can contribute towards our climate challenge!
The turbine house needs to be sensitively designed & architecturally sensitive! Larch cladding & slate/tin roof?
Is there anything else that can be housed in/next to turbine house at same time? Community building/services? Toilets?

Wreck fire falling
plans. 1 x 20' 5" dia
spruce soaks up 300L
water per day. Remove
1000 from a slope and
cutdowns change
massively
