Topics

- Registering on PCS-Tender
- Navigating PCS-tender as a supplier
  - Accessing Procurement Documents
  - Expressing Interest in an opportunity
- Managing your Profile
  - Extending Profile (Responses to Standard questions)
  - Additional Users
PCS-Tender is the national e-Tendering system, centrally funded by the Scottish Government.

It is a secure and efficient means for buyers and suppliers to manage tender exercises online.

The standard European Single Procurement Document – ESPD (Scotland) and ITT templates enable buyers to create consistent tender documentation.

Public Contracts Scotland ([www.publiccontractsscotland.gov.uk](http://www.publiccontractsscotland.gov.uk)) and PCS-Tender ([www.publictendersscotland.publiccontractsscotland.gov.uk](http://www.publictendersscotland.publiccontractsscotland.gov.uk)) are different systems.
First of all please check whether your organisation is registered. If your organisation does not have an account on PCS-Tender, you will need to register in order to access the system. If someone within your organisation previously registered, please note you can add Additional Users to an existing account which is covered later on in the presentation. To begin the registration process click Register as a Supplier.
You will then be presented with a User Agreement which you must confirm that you have read and agreed to before you can create an account for your organisation on PCS-Tender.
PLEASE NOTE: If you are the first user to create an account for your organisation, you will be a Super User. This allows you to modify your organisation’s registration details and add additional users. If your organisation already has an account on PCS-Tender, please request that your Super User creates a user account for you.
Organisation Details: populate the mandatory fields (donated by *) in the Organisation Details and User Details, clicking Save when finished.
Complete the **User Details** information:
- First Name
- Last Name
- Phone Number etc
On the following screens you must specify, from the drop-down menus provided, your organisations employee ranges
Your organisation’s turnover and balance sheet ranges
The system will then send an automated email to the email address specified in your user details containing a temporary password.

Following your initial login with this temporary password, you will be presented with this screen, prompting you to create a new password.
Following successful login you will be presented with the landing page with system menu options.
From the landing page, you are able to:

• Access procurement documents for opportunities that you may be interested in.

You may find that responses to some European Single Procurement Document (ESPD – Scotland) questions are pre-populated with responses you have submitted previously. Please note it is your responsibility to validate that these answers are correct and valid before submitting. You must edit and update any responses that are no longer valid prior to submitting your response.

• View your dashboard where you can access procurement documents that you have previously registered interest in, retrieve any messages and respond to Supplier Surveys.

• You can amend your organisation’s profile information and manage additional users.
Select either the PQQ or ITT option from the Projects area and you will be presented with a list of tender opportunities that are open to all suppliers.
To find a specific PQQ or ITT within this list you can filter the list to search for the relevant document.
To search using the Product Code referenced in the PCS Notice select **Project Code** from the **Select and Filter** drop down menu. Then from the **Search Criteria** menu select **Contains**, in Value type the numeric code associated to the project and then click **Search**. You will then be presented with a list of results based on the value you have searched for.
PLEASE NOTE: When searching by the project code you will be presented with all the PQQs or ITTs within that particular project. This will ensure you do not accidentally miss any opportunities available to you. Multi Lot ITTs are displayed as separate Lots under one project code, and you will need to express interest in at least one of the lots. This will automatically enrol you in the mandatory or “Master ITT” that needs to be completed and submitted in order for you to submit your responses to the lots.

Once you have completed and submitted the “Master ITT”, you will be required to submit all subsequent (relevant) lot responses individually, by clicking on the submit button for each specific and relevant lot.
Once you have clicked on the PQQ/ITT Title, you will be able to view the basic settings, a PDF Printable of the PQQ/ITT, including all the Settings, Questions and Weightings, and from here you can also Express Interest if you would like to create a response and submit a bid.
PLEASE NOTE: if you are responding to a PIN as a Call for Competition, all you need to do is click on **Express Interest** to inform the Buyer you are interested in their Procurement Exercise. The buyer will then contact you in due course to confirm if you are still interested, via the messaging service within the PQQ or ITT.
PCS Tender Help and Support
On the PCS-Tender homepage click **System Requirements** to check your PC/Laptop settings against the PCS-Tender system **Technical Requirements**.
For system and technical queries, suppliers can contact the PCS-Tender Help Desk by telephone or email. You can find the Help Desk contact details on the PCS-Tender homepage.
PCS-Tender Messaging System
For Invitation to Tender questions and queries, suppliers can message the buyer by means of the PCS-Tender Messaging system

**Important:** details of the PCS-Tender Messaging System can be found in the PCS-Tender Supplier Response Guide:

You can send and receive messages with the buyer by means of the PCS-Tender messaging system.

The PCS-Tender messaging functionality is located in the PQQ/ITT.

The PCS-Tender messaging system operates in a similar fashion to any other email facility. The Buyer may send you (or all suppliers) messages by means of this functionality.

In the first instance you will receive an email alert notification informing you of a newly posted message.
Dear User,

Please note that a new message has been published relating to the following Event on Training Portal - Public Contracts Scotland:

**Message:**

- **From:** PCS-T
- **Buyer Organisation:**
- **Subject:** Message

**Event Type:** ITT - Invitation to Tender

**Code:**

**Title:**

To view the details of the message please click the following link and enter your Username and Password:

https://www.publictenderscotland.gov.uk/coop/guest/login.do?

Or browse as follows:
- Connect to https://www.publictenderscotland.gov.uk and enter your Username and Password.
- Browse to the My PQs or My ITTs area and click on ITT - Invitation to Tenders Code it_1
- Browse to the Messages heading;

GUIDANCE ON SPAM FILTERS:
In order to prevent eTendering portal emails from being quarantined by your organisation fire wall or spam filter, you are advised to instruct your IT team to accept all emails from help@bravosolution.co.uk or with a *.bravosolution.com" extension.
Please also review the Junk Email settings of your email client software to avoid accidental message deletion.

A supplier can access the Message by following the instructions in the email.
Helpful Tip – The PCS-Tender New Messages portlet provides quick and easy access to your new message(s).
To access the New Messages portlet, login to the website and select the Dashboard menu option.
Click on the unread Messages link in the New Messages portlet.
New Messages portlet link provides direct access to the new message. Click on the new message to access the new message details.
Should you wish to reply to the message click **Reply**.
Enter text in the **My Message** area and **Send Message**.
Please note you may find the **New Message** portlet located in another area of the Dashboard. To move the portlet to a more visible area, anchor the New Message title with your mouse, drag, wait for the green arrow beside the title and release.
New Messages portlet status No Unread Messages
You can access the messages you have read, responded to and sent by navigating to the **My ITTs** area. In the **My ITTs** area use the **Filter by** option to search for your ITT. Once found, click on the ITT.
“Pin” the Message tab with your mouse to access **Create Message, Received Messages, Sent Messages, Draft Messages** and **Forwarded Messages** areas.
Managing your Profile

- Extended Profile (Responses to Standard questions)
- Additional Users
From the landing page click Manage your Profile which will allow you to access your Extended Profile area.
You will notice a list of forms, each of which contain a set of questions specific to that particular topic (e.g., Information about the bidder).
To edit your profile, click into each form and then select **Edit** to complete the form questions. Saving your answers will progress you to the next set of questions. You can also move between sections by clicking the **Next** button.
To review your answers to the questions in your supplier Extended Profile, you can click **Print your Supplier Profile**.

Click **Print** to print all the sections and questions in your supplier Extended Profile or select **Export your Supplier Profile into PDF** to convert all sections and questions into a PDF file.

**PCS – Tender Supplier Registration Guide**

**PCS-Tender Supplier Response Guide**

These questions are Standardised ESPD (Scotland) questions.

Completed and stored Standardised ESPD Supplier Extended Profile questions, will pre-populate tender ESPD standard tender questions you express interest in.
In tenders you express interest in and respond to if responses have been pre-populated, for your Supplier Extended Profile, it is very important that you validate and if necessary edit/change any responses that are outdated or not applicable to the particular opportunity you are responding to, prior to final submission of your response.
Your supplier **Extended Profile** is updated on the acceptance and opening of the response by the buyer.
See screenshot: RFD Request for Documentation section
You may be asked to provide documentation, certificates or other supporting evidence in relation to the information you provided in your ESPD response. This may be facilitated through an additional set of questions on the system known as a RFD (Request for Documentation).

You will be invited by the buyer and will receive an email alert confirming the details, code and closing date and time. You will find it in the My PQQs area. The way in which you respond to a Request for Documentation is no different to any PQQ or ITT within the system.
You may find that responses to some RFDs (Request for Documentation) questions are pre-populated with responses you have submitted previously.

Please note it is your responsibility to validate that these answers are correct and valid before it is submitted. You must edit and update any responses that are no longer valid prior to submitting your RFD (Request for Documentation).
Your Supplier Extended Profile Request for Documentation (Standard Questions) are updated on the acceptance and opening of the response by the buyer of the RFD (Request for Documentation).
Supplier Profile – Managing Users
Click the User Management tab in the menu on the left hand side, and select **Manage Users**.
Click the **Create** button to register the details of new users within your organisation’s account.
Once you have completed all of the mandatory fields click **Save** to finish setting up the new user account.

Note: The new user will be sent an email with their login details. This will include the username you have chosen for them and a temporary password to access PCS-Tender.
After creating the new user you will be asked to view the user rights of this user. As no “roles” have been created or allocated at this stage the new user currently has no access to any of the different modules within PCS-Tender.
Having clicked on View User Rights you will be able to grant relevant access rights to the new user using the **Edit** button.
If it is anticipated that many users will be setup under the organisation’s account and that many of the users will have similar access rights, it is advisable to setup roles.
Roles allow Super Users to quickly and easily assign the appropriate User Rights to user accounts, according to the function of the user within the organisation. To do this, click Back to List on the top left hand side of the screen. Roles can then be accessed and created from the left hand menu.
Once roles have been setup within your organisation’s account you will be able to assign these to both new and existing users. Users assigned one of the roles setup within your organisation will inherit the associated user rights of that role.
