Management focus for next plan:

We will continue to build on FLS's community & visitor management work of recent years & explore how best to add value to visitor appreciation & understanding of Callander Wood.

- We recognise that anti-social behaviour has increased so will:
- (1) Continue to work with external partners to target ASB hotspots & highlight the need for resources to control such activities.
 - (2) Review forest signage to make it easier for forest users & residents to report crime & prohibited motorised access.
 - (3) Continue interpretation & outreach work in local schools to foster ownership & responsible use of this woodland resource.

Woodland Management in Visitor Zones

FLS 'Visitor Zones' have been identified in areas where FLS encourage and manage access or where the woodland managed by FLS interacts with popular visitor sites or access routes.

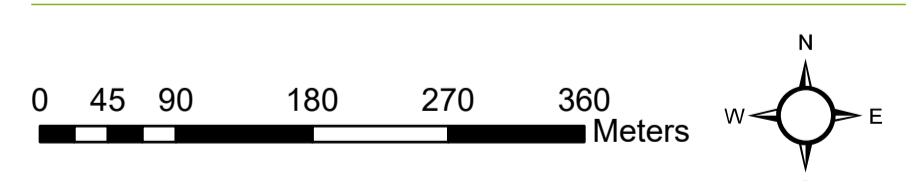

Visitor zones at Callander Wood are identified as 'Interactive Zones' comprising buffers around trails or the immediate environment which the public interact with.

In these areas, single trees or small groups of trees will be removed when necessary to protect facilities, infrastructure & trails, or to enhance the setting of features, or to maintain existing views.

Woodland in these zones will also be thinned, or trees re-spaced, for safety reasons (including to increase visibility to ensure that sites are welcoming and feel safe) & where it is necessary to enhance the experience of the forest setting, through the development of large trees, or preferential removal of trees to favour a particular species.

Legend

- Callander Wood LMP boundary
- FLS Visitor Zones
 - Interactive zone - Buffer around trail
 - FLS Formal & Informal Path Network
 - John Muir Way
 - Core Paths
 - Forest Access Tracks
