

Appendix 1 Land Management Plan Consultation Record

Event	Consultee	Date contacted	Date response received	Issue raised	Central Region Response
Drop-in event	Local Resident	21/01/2025	04/02/2025	We used to be able to access the forest from the entrance at Colrach house but there is a locked gate across the resident's garden	We are advised by the LLTNP access team that there is no longer a common access agreement across the land of Colrach house
Drop-in event	Local Resident	21/01/2025	08/02/2025	The paths have become very overgrown making it difficult to walk, may this be cleared back?	As part of our planned operations we will be able to clear some of the overgrown forest roads.
Drop-in event	Local Resident	21/01/2025	08/02/2025	Stay the night at the car park has been the worst thing to happen to the site with lots of toilet waste being left and multiple vehicles there at once.	Thank you for making us aware of this, it is a key aim of FLS that the forest is open to a diverse range of people. Please contact us with concerns about anti-social behaviour on our land so that we can ensure the forest is enjoyed by all.

Event	Consultee	Date contacted	Date response received	Issue raised	Central Region Response
Poster & Drop-in event	Drymen Paths Group	21/01/2025	04/02/2025	We may be interested in a formal agreement for volunteer activities on more informal paths but lack power tools.	Visitor services contacts given to pursue further and LLTNP Access Team details given to find out more about funding options.
Email & Drop-in event	East Loch Lomond Development Trust	21/01/2025	04/02/2025	No response on Garadhban.	n/a
Meeting	LLTNP – Access Team	21/01/2025	07/02/2025	We would support more proactive management of vegetation along the extensive forest road network to enable greater access around Garadhban. We would like to see public access be given higher priority in the south-west area of Garadhban, possibly through collaboration with the local and active Drymen Paths Group. An aspiration to create an offroad section of the Rob Roy way that travels through Garadhban and the adjacent FLS property of Greenburn would greatly enhance user experience.	We intend to maintain the roads more regularly, tying them in to thinning operations necessary to create a LISS woodland. We welcome community groups' use of the blocks but they must source their own training in order to meet health and safety standards. We do not have the resources currently to build an off road section of the Rob Roy way but will

Event	Consultee	Date contacted	Date response received	Issue raised	Central Region Response
					happily facilitate a funded project.
Meeting	LLTNP – Forestry Team	14/01/2025	16/01/2025	We welcome a plan that aims to produce and increase in diversity of species, age class, and in use of LISS.	Thank you for the response.
Email	Stirling Council – Planning	21/01/2025	No Response	n/a	n/a
Email	Stirling Council – Flooding	21/01/2025	No Response	n/a	n/a
Email	Stirling Council – Archaeology	21/01/2025	No Response	n/a	n/a
Email	Claire Glaister – Stirling and Tayside Timber Transport Group	21/01/2025	No Response	n/a	n/a
Email	Stirling Council – Timber Transport	21/01/2025	No Response	n/a	n/a
Email	WOSAS	21/01/2025	14/02/2025	There is a chambered cairn in the northwestern corner of the block that should be annotated. It is likely that there are undiscovered features within the woodland as it has not been thoroughly ground-surveyed and nearby areas that	Thanks for your response. We will include this information in the final LMP.

				have, possess a greater number of features.	
Email	RSPB	21/01/2025	No Response	n/a	n/a
Email	Scottish Badgers	21/01/2025	No Response	n/a	n/a
Email & Meeting	Montrose Estates	21/01/2025	29/01/2025	We have aspirational woodland creation schemes adjacent to the LMP area and are also interested in expanding Black Grouse habitat. We are concerned about deer numbers within Garadhban and would like to see a deer fence.	We support the expansion of woodland on neighbouring land. We will be improving our capacity to manage deer numbers within the LMP area through use of deer glades and collaboration with neighbours such as yourself. One of the reasons we are not proposing deer fencing is to prevent damage to the Black Grouse population as they are prone to increased mortality rates even when fences have a lot of hi-vis strike markers.
Email	Nature Scot	21/01/2025	No Response	n/a	n/a

Event	Consultee	Date contacted	Date response received	Issue raised	Central Region Response
Email	Historic Environment Scotland	21/01/2025	No Response	n/a	n/a
Email	SEPA	21/01/2025		The plan should aim to maximise opportunities to improve the riparian zone along main rivers and buffer small watercourses from planting or operations as per Forestry and Water guidelines. Private water supplies need to be identified and ground truth before operations.	Thank you for your comments. We aim to maintain riparian habitats in the block alongside productive thinning operations to promote healthy watercourses. Private water supplies will be identified prior to operations.
Site Visit	Scottish Forestry	06/01/2025	15/01/2025		
Email	Scottish Water	21/01/2025	19/02/2025	The work proposed is a low-risk development regarding water resources. We should be notified of any pollution incidents impacting the water body as a result of the work.	Thank you for the response.
Email	West Highland Way	21/01/2025	No Response	n/a	n/a
Email	Rob Roy Way	21/01/2025	No Response	n/a	n/a
