The map displays the Glen Loy Future Forest area, which is a large, irregularly shaped region outlined in blue. The forest is divided into numerous smaller plots, each labeled with a species mixture and a year. The species mixtures are represented by different colors and patterns: solid colors for pure species and patterns (dots or solid) for mixtures. The years range from 2025 to 2050. The map is overlaid with a grid of 10-degree squares. The background is a topographic map showing contour lines, rivers, and other geographical features. The map is titled 'Glen Loy Future Forest' and includes a scale bar (0 to 1 km) and a north arrow. The map is reproduced by permission of Ordnance Survey on behalf of HMSO, with copyright and database right reserved by the Crown in 2025. The map is also licensed by Bluesky International Ltd and Getmapping Plc in 2025. The map is a detailed plan for the future forest, showing the distribution of different tree species and the timing of their planting. The map is a key tool for forest management and planning.
