

Moray & Aberdeenshire Forest District **Roseisle**

Management

O.S. Grid Ref NJ 114665

Date July 2015

Scale: 1:15,000 @A2

Very dry site conditions make Scots pine a very suitable restock species. Due to the presence of DNB within the forest the restocking will be closely monitored and reconsidered if it dies due to DNB infection.

The site conditions are better at this end of the site. This allows the planting of oak with a good prospect of it being productive if managed correctly into the future. Natural regeneration of birch and other broadleaves is expected on this and other sites across the block to supplement the planted species.

- Car park
- Forest road
- Static dunes
- Burnt area
- Restock in plan period
- Felled
- Open
- Birch
- Birch/Scots pine
- Broadleaf
- Broadleaf/Conifer
- Conifer
- Conifer/Broadleaf
- Conifer/Scots pine
- Corsican pine
- Corsican pine/Scots pine
- Douglas fir
- Lodgepole pine
- Lodgepole pine/Scots pine
- Norway spruce/Birch
- Oak
- Scots pine
- Scots pine/Birch
- Scots pine/Broadleaf
- Scots pine/Corsican pine
- Scots pine/Lodgepole pine
- Scots pine/Sitka spruce
- Sitka spruce
- Sitka spruce/Birch
- Sitka spruce/Lodgepole pine
- Sitka spruce/Scots pine
