

Rannoch Forest and the Blackwood - Long Term Plan Scoping feedback analysis

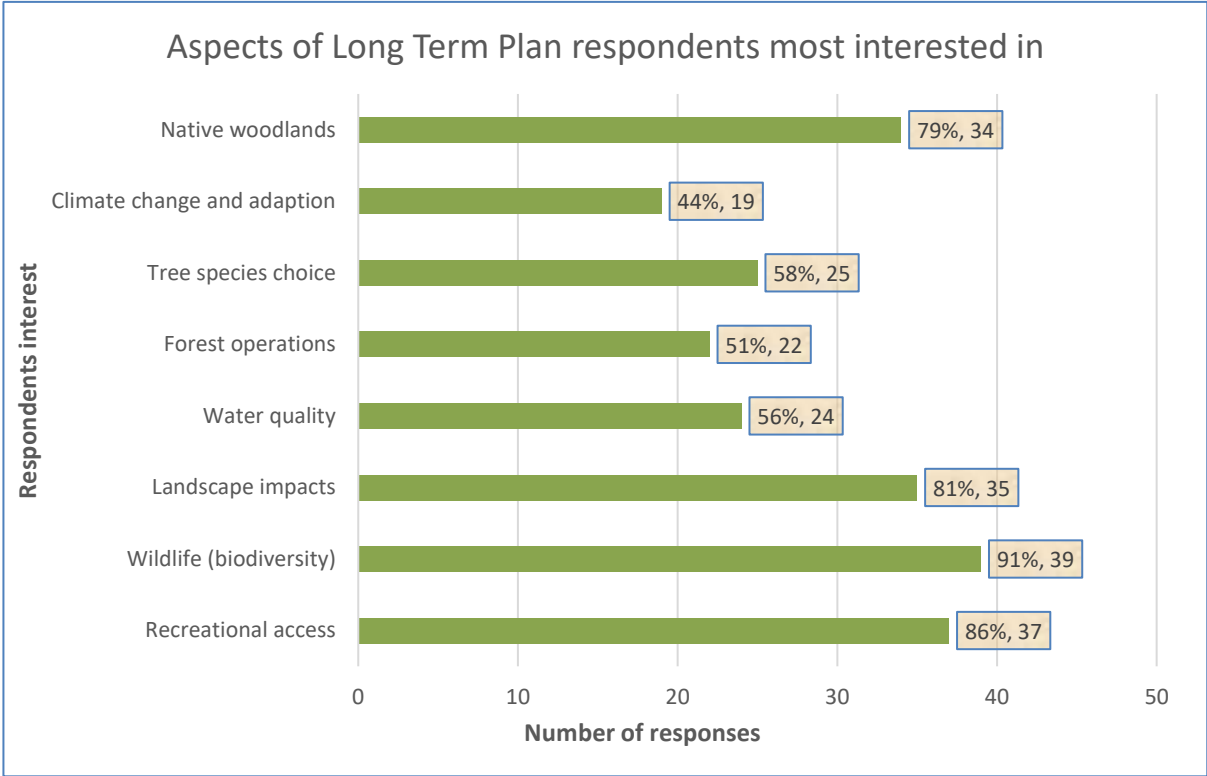

To gain a greater understanding of how residents and visitors use these forests, a QR code linking to an online questionnaire was displayed at forest gates around North and South Rannoch forests, on posters promoting our scoping meeting at Kinloch Rannoch. The questionnaire elicited information about how these forests are viewed and valued by residents and visitors to North and South Rannoch.

The results of this qualitative data is presented via Word Clouds. A visualisation tool that represents the frequency of word repetition in qualitative data, providing insight into potential themes and sentiments. A summary of the responses to these questions can be found below:

Question 1: What is your connection to North & South Rannoch (e.g. are you a neighbour or resident, do you use it regularly for recreation etc...)

Question 3. What aspects of the plan are you most interested in?

Question 4. Are there any significant features or issues FLS should be aware of in South Rannoch or North Rannoch Forests:
