

Minor glimpses of the forest edge from the west not significant

Fish Farm to the west of Mucomir. Water quality vitally important

Some wet flushes within the woodland.

Established stone quarry for local forest road building.

Central area has been felled and restocked under previous plan. Power-line and heritage features along General Wade's road have been maintained open.

Public road runs along the forest edge.

Best views of the forest are from little used minor roads to the south.

Southern edge of Loch Lochy

North western corner felled under the previous plan and due to be restocked with SS.

Major power line runs through the centre of the site. Smaller power-line lies to the eastern edge.

Entrance to the new forest road has been subject to some stability issues. Currently lacking in aesthetic appeal.

Views of the forest edge from the A82 are significant but are filtered through an area of scattered Scots pine and mixed broadleaves that are visually diverse.

Felling and restock under the previous plan has introduced some structural diversity.

Woodland has a well-developed road infrastructure.

Grounds of the restaurant on the eastern edge of Mucomir contains a maturing plantation of Scots pine. This creates an interesting edge and provides a cue for expansion into the woodland.

Commando memorial is one of the most visited memorials in Scotland. The classic views are to the east, but Mucomir provides part of the backdrop to the site.

**SITE ANALYSIS**

The eastern half of the area is contained within the Parallel roads geological SSSI. This area contains important geological features associated with glaciation.

Areas on the woodland margins and fringes are potential black grouse habitat.
