North Region Inverness Woodlands Management Plan Map 14: Recreation & Archaeology

We are aware that viewpoints in prominent places such as Craig Phadraig and Ord Hill are highly regarded by our visitors. We will continue to maintain and increase our key viewpoints to as high a standard as our resources allow.

We will work with Culloden Forest Partnership and explore opportunities to build a nature-based activity trail in Culloden Woodlands

We want to increase connectivity for city people without transportation:
- Whilst we will not be able to provide a bus service ourselves, we can promote public transport information via our website.
- We will consider other options for improving connectivity and discuss with Highland Council.

We know that many visitors could benefit from better seating:
- We will look for suitable opportunities to install some new benches along the waymarked trails

We recognise that dog waste can be a serious and unpleasant issue for all visitors. We will:
- Encourage more dog owners to remove dog waste through better behavioural signage
- Consider the provision of dog waste bins at key locations. We need to investigate costs and ease of emptying.

We appreciate visitors interest in exploring our woodlands on trails and cross-country. We will concentrate on maintaining our promoted waymarked trails and the gravel road network. Other paths and desire lines are available to use under SOAC but we are not able to commit to maintaining all minor trails.
