## Tay Forest District Tentsmuir

View 1 Monifieth Beach  
Grid Ref: NO 500 320  
Date: 17 SEPT 2012

### Visualisation of forest management proposals

The small internal pockets of felling coupes are not visible from Monifieth. Although DNB may have a significant impact on Tentsmuir, as affected coupes continue to be heavily thinned to attempt to minimise the impact, this will not be visible from such a distance

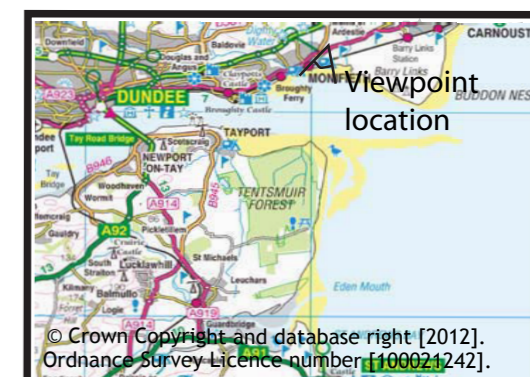

-  Phase 1 2012-16
-  Phase 2 2017-21
-  Phase 3 2022-26
-  Phase 4 2027-31
-  After 2047
-  Natural reserve
-  Long term retention
-  Low impact silviculture
-  Recently felled
-  Recently planted
-  Neighbouring woodland

2022

SNH landscape character assessment of this landscape type:

The landscape around Tentsmuir is a low lying section of coast from 0-5m's, has distant views, is medium scale, exposed and simple. There are strong coastal influences with an ever changing landscape of windblown shifting sand and sand dunes inland. The dunes are of ecological and geological interest.

## Tay Forest District Tentsmuir

View 1 West Sands Car Park  
Grid Ref: NO 497189  
Date: 03 SEPT 2012

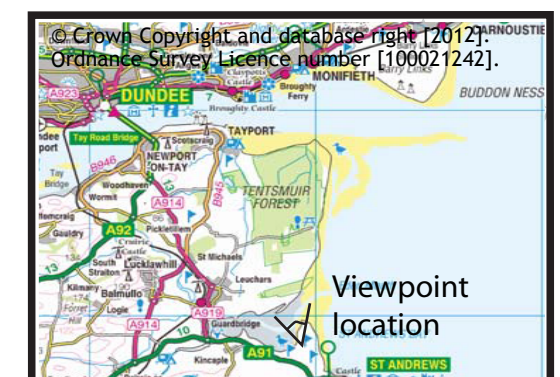

### Visualisation of forest management proposals

From St Andrews West Sands long distance views are of continuous cover. A small Phase 1 felling coupe is visible but of such a small scale within the wider landscape, that it will have negligible impact upon felling.

2022

	Phase 1 2012-16
	Phase 2 2017-21
	Phase 3 2022-26
	Phase 4 2027-31
	After 2047
	Natural reserve
	Long term retention
	Low impact silviculture
	Recently felled
	Recently planted
	Neighbouring woodland

Visually, Tentsmuir will not alter significantly from a distance. The pine continuous cover will be supported, but if it significantly suffers from DNB, other conifer species will be encouraged to regenerate.

Visually, Tentsmuir will not alter significantly from a distance. The pine continuous cover will be supported, but if it significantly suffers from DNB, other conifer species will be encouraged to regenerate.

2022

The small Phase 1 felling will hardly be visible as the backdrop of trees are at the same height

2032

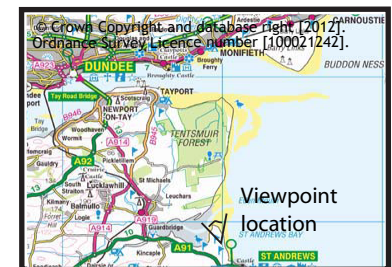

The visual effects of DNB are likely to be much more significant within the forest. If DNB does affect a coupe, it could be assessed to ensure that appropriate opportunities are taken to create internal views

View 1 West Sands Car Park  
Grid Ref: NO 497189  
Date: 18 SEPT 2012

### Visualisation of future habitats proposals

-  Sitka spruce
-  Norway spruce
-  Scots/Corsican pine
-  Lodgepole pine
-  Mixed conifers
-  Birch
-  Mixed broadleaves
-  Neighbouring woodland

### Tay Forest District Tentsmuir

View 2 Tayport Sands  
Grid Ref: NO 465 285  
Date: 17 SEPT 2012

#### Visualisation of future habitats proposals

2022

Even if there is a significant impact of DNB on the pines, the plan is flexible enough to allow the replanting of alternative conifers and broadleaves. The view is unlikely to change from a visual perspective, from these distant viewpoints.

2032

-  Sitka spruce
-  Norway spruce
-  Scots/Corsican pine
-  Lodgepole pine
-  Mixed conifers
-  Birch
-  Mixed broadleaves
-  Neighbouring woodland

Grid Ref: NO 465 285  
Date: 17 SEPT 2012

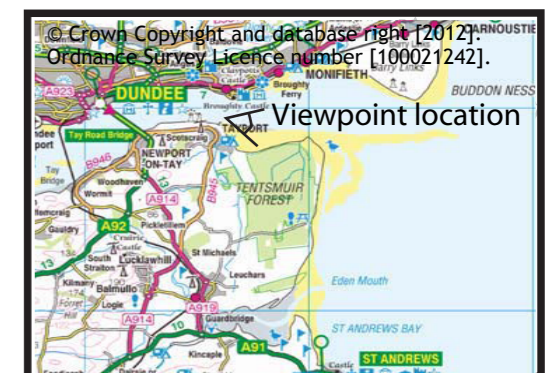

Visualisation of forest management proposals

As with the view from Monifieth, no internal felling coupes are visible from Tayport. Although significant thinning may just be visible from here, the forest will still read as a mass of trees.

2022

-  Phase 1 2012-16
-  Phase 2 2017-21
-  Phase 3 2022-26
-  Phase 4 2027-31

## Tay Forest District Tentsmuir

View 1 Monifieth Beach  
Grid Ref: NO 500320  
Date: 17 SEPT 2012

### Visualisation of future habitats proposals

2012

From Monifieth to the the North, Tentsmuir appears as a flat line of trees on the other side of the River Tay. Restock of the small felling coupes would not be visible. Even if there were catastrophic effects of DNB on Tentsmuir in the next 10 years, there will be no visible change to the forest from this viewpoint, as other conifers would be encouraged to regenerate.

2032

-  Sitka spruce
-  Norway spruce
-  Scots/Corsican pine
-  Lodgepole pine
-  Mixed conifers
-  Birch
-  Mixed broadleaves
-  Neighbouring woodland
