Scotland's national forests and land are responsibly managed to the UK Woodland Assurance Standard.

birch and rowan planting adjacent to wayleave in the red zone to avoid future red zone working.

Gley soils to be restocked with Sitka spruce in blocky mixtures with alternative conifers where the soil allows

Spruce suffering heather check, restock with Scots pine.

riparian zones will be planted with 50% open space and native broadleaves

drier soil more suitable to Scots pine

pure birch stand, thinned and productive

wetter soils and riparian zone to be restocked with 70% alder, willow and downy birch and 30% open ground

LISS coupe is likely to regenerate with norway spruce and larch
