

Draft Management Objectives for next Long Term Plan (LTP)

1. Enhance forest resilience & maintain timber output for future rotations by improving species & structural diversity.
2. Work constructively with Heathland windfarm developer and consider current forest management to support this development.
3. Plan for the phased removal of larch species in mature stands & maintain a contingency felling plan for larch in younger stands.
4. Enhance ecological & visual diversity by expanding mixed woodland habitat networks, retaining natural reserves & long term retentions & restoring priority open mires (from forest to bog).
5. Protect & maintain heritage features notably three Scheduled Monuments.
6. Maintain the existing recreation offering & work with partners to encourage responsible use of the site.
