

## Appendix I: Consultation Record

### Scoping – Record of Statutory Consultation

Consultee	Date Contacted	Date Responded	Issue	Comment
FLS Stakeholder	10th Dec 2020		Deer numbers are only maintainable with the high quality boundary fence.	Include budget for fence maintenance.
FLS Stakeholder	10th Dec 2020		Road maintenance and pattern of use cause haulage issues.	Include road maintenance in LMP.
FLS Stakeholder	10th Dec 2020		Deep Peat at north of block.	Survey depth to inform restock prescription. Peat restoration proposed in LMP.
FLS Stakeholder	10th Dec 2020		50% of woodland by area achieving or past MMAI in plan period	Address in felling phases.
FLS Stakeholder	10th Dec 2020		Larch component P.ramorum – 60 ha with SPHN in the block in 2020.	Glenisla LMP will address removal of mature larch to control P.ramorum via adopting FLS Larch Strategy.
FLS Stakeholder	10th Dec 2020		Species conservation - mammals & raptors.	Pattern and scale of coupes and rate of change factored into proposed felling coupes.
FLS Stakeholder	10th Dec 2020		Access to coupes in Glen Markie restricted by limited forest road network and potentially a weak road adjacent to reservoir.	New road building proposed for Glen Markie block to access mature timber and extensive windblow.
FLS Stakeholder	10th Dec 2020		Landscape above Backwater Reservoir.	Storm Arwen subsequently has forced large change on the eastern slopes of the Glen Markie block due to catastrophic windblow. LMP an opportunity and propose species diversification to mitigate diseases and improve landscape and biodiversity.
FLS Stakeholder	10th Dec 2020		Species diversity. Currently forest is Sitka spruce heavy and non UKFS compliant for mixed broadleaves.	LMP proposes Woodland Creation and riparian planting of 284.41 ha. Most new planting will be broadleaves.
FLS Stakeholder	10th Dec 2020		Timing constraints for operations.	Points have been noted. New proposed roads may offer greater flexibility for working around time constraints in some areas of the forest.
FLS Stakeholder	10th Dec 2020		Resource constraints for prescribed operations. Especially fences and soft species respacing.	Points have been noted and will be taken forward at the design stage.
FLS Stakeholder	10th Dec 2020		Neighbour obligations. Road maintenance, land take, water supply maintenance etc	Proposed riparian planting should improve water quality and supplies. Productive conifer area to be reduced around some key watercourses to protect water quality and supply.
Nature Scot.	6th Jan 2021	No response received	No response received	-
Historic Environment Scotland (HES)	6th Jan 2021	25/01/2021	There are no HES assets impacted within the area of the LMP. The plan for Glenisla Forest should have no significant impact and we have no comments to make.	-
Perth and Kinross Council	6th Jan 2021	-	No response received.	-
Scottish Forestry	6th Jan 2021	-	No response received.	-
Scottish Water	6th Jan 2021	-	-	No response received. Scottish Water will be consulted 90 days prior to forestry work which potentially impacts their DWPA and operations.
SEPA	6th Jan 2021	-	-	No response received

## Scoping Record of Non Statutory consultees (names of individual consultees have been redacted for data protection reasons)

Consultee	Date Contacted	Date Responded	Issue	Comment
Ecomuseum	6th Jan 2021	11th Jan 2021	Recreation potential to be optimised. Maintain core paths etc. CEM has plans for further cycle routes in the area. Ease of public access to archaeology. Community involvement in management of outputs from the forest in relation to climate action and biodiversity.	FLS Glen Isla LMP proposes Woodland Creation and peatland restoration to deliver biodiversity benefits and carbon sequestration. Due to budget limitations and low visitor traffic in the block it is unlikely there will be an increase in existing recreational investment. Existing core paths will be maintained.
Ramblers Association	6th Jan 2021	-	No response received.	-
Saving Wildcats	6th Jan 2021	2nd Feb 2021	Scottish Wildcats will respond via Nature Scot.	-
Glen Isla Play	6th Jan 2021		No response received.	-
RSPB	6th Jan 2021	-	No response received.	-
Neighbour	6th Jan 2021	15th Jan 2021	Concerns over water supply lade which is in poor condition. Subject to damage by windblow and operations.	Lade & its infrastructure is the responsibility of owners. Proposal for restocking of low density broadleaves will protect riparian area and will remove risk, as no harvesting operations will be required.
Neighbour	6th Jan 2021	25th Jan 2021	Concern about protection of their drinking water supply. Historic issue of disrupted supply by a third party (not FLS) and does not want a repeat of the issue.	FLS will follow guidelines set out in the most up to date Forest and Water guidelines when planning all management operations in this LMP.
Neighbour	6th Jan 2021	10th Mar 2021	Supportive of the idea of increasing tree species diversity as it is a great pleasure walking in the hills and viewing nature. Concerns over water supply lade damage from storms.	Lade & its infrastructure is the responsibility of owners. Proposal for restocking of low density broadleaves will protect riparian area and will remove risk, as no harvesting operations will be required in. Wider Woodland Creation proposal should increase wildlife species diversity.

## Consultation:

### Record of Statutory Consultation:

Consultee	Date Contacted	Date Responded	Issue	Comment
Angus County Council		11/01/2023	Creative use of FLS land for eco-tourism to create local employment. LMP should also focus on Climate Emergency & Biodiversity and native woodland creation.	LMP has increase in broadleaf planting and wider species selection to help mitigate climate change.

### Record of Non Statutory Consultees:

Consultee	Date Contacted	Date Responded	Issue	Comment
Neighbour	11/01/2023	11/01/2023	Encourage deer leaps to draw deer from forest to open hill. Increase fox control on FLS land.	Relayed to Wildlife Management team.
Neighbour	11/01/2023	11/01/2023	Increase & improve environmental interpretation & target more at families and children. Make a link with Isla Primary School. Potential for Forest Schools.	Raised with FLS Visitor Services team.
Neighbour	11/01/2023	11/01/2023	More walking routes, including some shorter routes. More viewpoints required within the forest.	Raised with FLS Visitor Services team.
Neighbour	11/01/2023	11/01/2023	Would like to see deer management plan.	A deer management plan, led by the FLS Wildlife Management team will continue to be utilised.
Neighbour	11/01/2023	11/01/2023	Walking in forest has become more difficult due to windblow. Increased forestry traffic due to windblow response. Improved brash management. Forest road maintenance needs improved. Increase amenity woodlands element so not just commercial forestry. Encourage all vehicles to keep to 15 mph speed limit. Improve forest road drainage. Concerns over water resource protection.	Proposed Phase 1 felling coupes in LMP are designed to address the Storm Arwen windblow. Forest road maintenance is being factored into the LMP. Expansion of broadleaves is proposed by Woodland Creation proposals. FLS have reminded all staff and road users of the 15 mph speed limit within the forest.
Neighbour	11/01/2023	11/01/2023	Improved internal ditch management and forest road maintenance.	Roads and ditch management concerns raised internally.
Neighbour	11/01/2023	11/01/2023	Excess vehicle speed by some road users. Would like more interpretation on site. Would like more native tree species in forest. Road and ditch management concerns.	FLS have reminded all staff and road users of the 15 mph speed limit within the forest. Interpretation issue raised with FLS Visitor Services team, but due to budget limitations and low visitor traffic in the block, it is unlikely there will be an increase in existing recreational investment. Woodland Creation will see a large increase in native tree species planting. Roads and ditch management concerns raised internally.
Neighbour	11/01/2023	11/01/2023	Poorly maintained roads and paths. Lack of circular trails.	Raised with FLS Visitor Services team, but due to budget limitations and low visitor traffic in the block, it is unlikely there will be an increase in existing recreational investment. Forest road maintenance is being factored into the LMP.
Neighbour	11/01/2023	11/01/2023	Road maintenance. Run-off mitigation from clearfell sites.	Forest road maintenance is being factored into the LMP and run-off issue being shared internally.
Neighbour	11/01/2023	11/01/2023	Access to Glenmarkie via historic route.	FLS confirmed that a new road was being built and this historic access would see reduced traffic volumes.
